## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barry et al. (5,976,201).

The Barry reference discloses a diesel fuel having a specific gravity typically in the range of 0.82 to 0.83, a viscosity typically in the range from 1.7 to 1.9 cSt at 40°C, and a sulfur content of not greater than 0.1 wt%. One specific example of the fuel has a sulfur content of 0.01%. See

Art Unit: 1764

column 2, lines 3-10 and 60-67 and col. 4, lines 11-42.

The Barry reference does not disclose the use of the fuel in a rail fuel system compression ignition engine.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified the teachings of the Barry reference by utilizing the fuel of Barry in a rail fuel system compression ignition engine because one would utilize a known diesel fuel in any diesel engine regardless of its specific use and expect the engine to work effectively.

### ***Response to Arguments***

The argument that it would not have been obvious to utilize the fuel of Barry in a rail fuel system compression ignition engine is not persuasive. While Barry discloses that the fuel is suitable for use in underground mining engines, Barry does not disclose or suggest that this use is the only use for the disclosed diesel fuel. The examiner maintains that one having ordinary skill in the art would expect a known diesel fuel such as that disclosed by Barry to be satisfactorily utilized by any compression ignition engine.

### ***Conclusion***

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after

Art Unit: 1764

the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
